

Is your On-Premise Laundry eating into your profitability?

Numbers Don't Lie. The real costs of maintaining an OPL are more damaging to your bottom line than you might think:

- ▶ Consider the thousands you are paying for recurring costs for detergents, fabric softeners, bleach, stain removers and more.
- ▶ Plus, the tens of thousands you are absorbing for maintaining & replacing commercial equipment like washers and dryers. And what happens to your operation when one of those machines fail?

When you do the math, it's clear that ditching your OPL makes financial sense.

Plus, you'll not only save money, but also save time when you consolidate your suppliers into a single trusted partner dedicated to delivering world-class service and industry-leading infection prevention. You'll experience the ease and efficiency of having **everything you need all from a single source.**

Ready to simplify & save? We're ready to be your **one-stop shop** for all your linen, laundry and facility service needs.

Protect your patients – and your profitability – by partnering with ImageFIRST today.
